The Kaneb Center for Teaching and Learning presents:

Cheating Lessons: Learning from Academic Dishonesty

Friday, November 1
10:00-11:30 a.m.
The Fishbowl,
Hesburgh Library (1st Floor)

James M. Lang, Ph.D.
Associate Professor of English and
Director of the Center for Teaching
Excellence at Assumption College, will
discuss his latest book Cheating Lessons:
Learning from Academic Dishonesty

When students engage in
academically dishonest behaviors, they
are reacting inappropriately to a learning
environment that has not sufficiently
captured their attention or motivated them
to learn.

Dr. Lang will address how to gain a
better understanding of the reasons for
academically dishonest behavior and use
that knowledge to build better learning
environments.

Drawing on research in cognitive theory,
Dr. Lang describes the differences between
how novice learners process and understand
new information and ideas, and how their
processes differ from those of the experts
who are teaching them. Recognizing these
differences may help design courses, units, or
assignments that foster more richly connected
knowledge networks within students.
