2012 Reilly Center Forum

Cyber War and Peace

**** NEW DATE AND TIME ****

Monday, April 23
3-5pm

Scott Shackelford, Kelley School of Business, Indiana University

Monday, April 23, 2012

3-5pm

210-4 McKenna Hall

Is cyber peace possible? If so, what might it look like?

Shackelford will analyze the merits and drawbacks of the emerging “polycentric” approach to cybersecurity that includes both the public and private sectors with regulation occurring at multiple levels. One component of cyber peace is defining state responsibility for cyber attacks. At a time in which the unchecked sovereign authority of states is being challenged across many arenas, state responsibility remains a key component of international security. But the speed and anonymity of cyber attacks makes proving state responsibility difficult. Prof. Shackelford will analyze potential legal regimes of state responsibility for cyber attacks, and speak more generally about the applicability of international law and relations to conceptualizing cybersecurity and fostering cyber peace.

Scott Shackelford is Assistant Professor of Business Law & Ethics at Indiana University’s Kelley School of Business. He received his PhD in International Relations from Cambridge in 2011, an M.Phil. in International Relations from Cambridge in 2006, and a J.D. from Stanford Law School in 2009. His book *Cyber Peace: Managing Cyber Attacks in International Law, Business and Relations* is forthcoming from Cambridge University Press in 2012.
